

Digital Transformation of Fax

SILVERFAX™

FAXING EFFICIENCY = STAFF PRODUCTIVITY

To assure your critical resources are used most effectively, your staff needs to do more with less – including more productivity in less time.

Administrative costs represent 25% of overall spending in U.S. hospitals*; they bloat budgets in physician offices, long-term care. If your organization could better control a segment of those costs, wouldn't you take advantage of the chance?

Focus on what you do best – and leave the rest to Silver Compass

SilverFAX™ replaces your current fax machine – or even two or three of your machines – with a single high-tech device. Its proprietary programming drives ultra-fast transmission speeds and guarantees delivery both outbound and inbound.

SilverFAX™ also:

- Encrypts sensitive, protected documents from end-to-end
- Eliminates the need for costly regular phone lines

Learn more about how SilverFAX™ can help you save staff time and make better use of your administrative budget.
